SUMMARY

Computer Science and Engineering undergraduate trained in data lifecycle management, combining core academic coursework with practical project experience in SQL, Python, and Tableau. Eager to apply skills in dataset standardization, root cause analysis, and dashboarding to support data driven decision making in a collaborative environment.

EXPERIENCE

Data Science & AI Intern | ARDENT | June 2025 – July 2025 | Kolkata, India

- Conducted EDA and data preprocessing on multi-modal text datasets (40,000+ records) using Python (Pandas, NumPy), resolving missing values and data inconsistencies to improve overall dataset quality and model accuracy.
- Developed interactive Streamlit dashboards to visualize dataset metrics, feature trends, and generated actionable insights, enabling non-technical stakeholders to interpret findings and support data driven decision making.
- Standardized data cleaning workflows for handling text anomalies, missing values, and inconsistent records, improving dataset consistency and streamlining downstream analysis and model evaluation.

EDUCATION

B. Tech | CSE | Heritage Institute of Technology, Kolkata | July 2022- Expected Completion: July 2026 | CGPA: 7.8/10.0

Class 12 | CBSE | Shri Shikshayatan School, Kolkata | April 2021 - June 2022 | 80%

Class 10 | CBSE | Shri Shikshayatan School, Kolkata | April 2019 - March 2020 | 96%

CORE SKILLS

- SQL & Databases :** Multitable Joins | CTEs | Window Functions | Aggregations | PostgreSQL | MySQL | NoSQL (MongoDB)
- Programming & Statistical Analysis:** Python (Pandas, NumPy, Scikit-learn) | EDA | Hypothesis Testing | R | Java
- Data Visualization :** Tableau | Microsoft Power BI | Streamlit | Matplotlib | Seaborn
- Spreadsheets & Google Workspace:** Google Sheets | Google Docs | Microsoft Excel (XLOOKUP, VLOOKUP, Pivot Tables)
- Data Operations & Methods:** Data Cleaning | Anomaly Detection | ETL Pipelines | Root Cause Analysis | Data Storytelling | Cross-Functional Collaboration | KPI Reporting | Data Validation | Dashboard Development | Data Lifecycle Management

VIRTUAL INTERNSHIPS AND PROJECTS

Global Supply Chain Analytics & Congestion Study | Independent Project

- Data Processing & Cleaning:** Processed and cleaned an enterprise-scale supply chain dataset of **180,000+ transactional records** (generating **₹36.78M+ in sales**) using SQL queries and data transformation techniques.
- Fulfillment & Latency Risk Analysis:** Conducted delivery performance and bottleneck trend analysis, identifying **98,000+ orders (~55%) affected by late delivery risk** across global regions (Europe, LATAM, Pacific Asia, USCA, Africa).
- Business Insights & Dashboarding:** Designed an interactive **Tableau dashboard** tracking core KPIs including order profit per segment, top performing product categories, shipping modes (Standard Class driving ₹22M+ sales), and country level revenue drivers to support stakeholder decision making.

Data Analytics Job Simulation | Deloitte, via Forage | July 2026

- Parsed complex JSON telemetry data and built an interactive Tableau dashboard to analyze and visualize machine downtime metrics.
- Executed forensic data classification in MS Excel to evaluate pay equality and isolate organizational anomalies.

Data Visualization: Empowering Business with Effective Insights | Tata, via Forage | July 2026

- Formulated 8 targeted questions, 4 each for the CEO and CMO, generating insights for business performance and expansion planning.
- Analyzed large datasets of up to half a million rows using Power Query in Power BI
- Built visuals around 4 questions the CEO and CMO requested, resulting in a better understanding of the data

PUBLICATION

FLARE-HEALTH: AI-Driven IoT-WSN Framework for Flood-Triggered Disease Surveillance | Published Research

Presented at the International Conference on AI, Healthcare, Smart Sensor and Social Technologies (AI-HCSST) 2025

- Co-designed** an end-to-end IoT-Wireless Sensor Network (WSN) integrating biosensors for real time monitoring of microbial contamination, water levels, humidity, and temperature.
- Engineered** machine learning pipelines, achieving **99.8% classification accuracy** for water contamination using Random Forest models, and predicted flood occurrences via LSTM architectures and Kalman Filtering.
- Formulated** a composite Disease Risk Index (DRI) utilizing ensemble learning, and optimized network wide sensor node deployment using Particle Swarm Optimization (PSO).

CERTIFICATIONS

Google Data Analytics Professional Certificate | Google, via Coursera | In Progress-Expected Completion: Aug 2026

- Relevant Coursework & Tools: Data Cleaning, SQL, R Programming, Tableau, Data Visualization, Spreadsheet Analysis.

SQL (Advanced) Skills Certificate | HackerRank | July 2026

- Key Skills Validated:** Complex Queries, Window Functions, Joins & Subqueries, Aggregations, Performance Tuning.

ADDITIONAL INFORMATION

- Languages:** English (Professional), Bengali (Native), Hindi (Professional), French (Elementary)
